# TIPS & TRICKS

## DEVS RECOMMENDATIONS

---

**Historical Markers** Hundreds of markers are available for discovery in the world. Locate them with your map using activity filters.

**Work like it's 431 BCE** Simply walk over empty white circles on the ground when near them and let go of the controls. Why not take a picture of yourself while pressing grapes?

**Feluccas** You are a great sailor! Your felucca can sail even over deep waters and will not break.

**Reset all tours** You can reset all tours from the Tours Menu. Careful though: this is irreversible! Once reset, you must restart your visits and progress from scratch!

**Bird view autopilot** When on your horse, try the auto-follow road (HOLD "A") + call your eagle (DPAD UP). You will have an aerial view of the whole landscape you are travelling through!

**Zoom-in** When in First Person View (RB) press LB (or right-click the mouse) to zoom in on precise details.
